Want a motorbike racing experience that requires a more skillful element than competing with other players? Trial Xtreme 4 will help you to fulfill that desire. Following the success of the first three seasons, Trial Xtreme series finally released the fourth installment to satisfy the gaming community. Trial Xtreme 4 is released with significant improvements in graphics, sound, and effects. The gameplay remains the same because it is the soul of the entire series. What is already too familiar to Trial Xtreme fans. As for those who first come to this game, I will recommend it to you. With a game that requires tactic and skillful reflexes, you will enjoy a very new and unique feeling. It is a racing game, but there are no opponents for you to face. Your opponents are the obstacles arranged in each level of play. Your mission is to get past all the stripped objects and go straight to the finish line. Download Trial Xtreme 4 mod - Demonstrating powerful skills. When you start the game screen, you will be taken to an arbitrary area depending on the screen. There your character is a racer with his motorcycle. Along with pre-arranged terrain and obstacles. You will control your car moving with virtual keys on the screen. There are accelerator buttons, front and rear brakes, spring-loaded for you to comfortably combine them in the most reasonable way. In Trial Xtreme 4, you cannot turn, make a turn, or make a U-turn. You can only move forward in a straight line, pass objects, reach the destination and complete the level. Speaking of which, you will feel this game is not interesting. No opponents, no turns, just go straight. What is the racing game? But not as you might think, the gameplay in Trial Xtreme 4 is inherently special. It is different from other games of the same genre, so its gameplay must be very unique to own such a large fan base. Lots of challenging levels. Trial Xtreme 4 has more than 200 levels of gameplay with increasing difficulty with each level. You will practice from the first levels to be able to get acquainted. Then gradually increase the level to practice and improve the necessary skills. There are techniques you must master. If you can't learn any technique you'll get stuck in a certain area. Combining unpredictable and unpredictable elements from each level will improve your skills and quick reflexes. Sometimes they become so mature that creating incredibly illogical flight moves will make you laugh. Compete against other people. Yes, I said earlier that this game has no rivals. Now that you can compete with other players? However, what I want to say here is that you can use your smooth and magical skills to compete with each other. Show your level together to see who will be the fastest and most skilled finish. In addition, Trial Xtreme 4 also includes a 2 player mode. Of course, the main goal is not to play to see who finishes first. Mainly finding out who is the most highly skilled and the most beautiful. Show off to your friends and everyone using your high-tech. Upgrades for your vehicle. Through each game screen, the difficulty will increase higher. Without a vehicle that is strong and durable enough, you will definitely not be able to gradually increase the challenges. What you need to do is to repair and upgrade your car. Improved parts such as engines, wheels, frames, springs ... Complete the basic details to be able to overcome the challenges more easily. Customize the vehicle to suit each game screen with different terrain features. If you are bored with basic car design, change the color and refurbish the parts to make it more beautiful, more handed when riding. Experience Trial Xtreme 4 will give you a very new and extremely interesting feeling. The game offers you another way to control cars you've never seen before. Compared to racing games that have been extremely popular in the market. Trial Xtreme 4 is a very good product that you can consider to try something new and creative.
